

Northern Utah Protective Association

2022 Mormon Cricket and Grasshopper Control Project

Sign Up Sheet

NUPA is coordinating aerial application of Diflubenzuron (Dimilin, Unforgiven). The application will be the maximum allowed per label at 2oz per acre for maximum effective control and residual control. The Reduced Agent Area Treatment (RAAT) system will be used. The RAAT system is a proven integrated pest management system that chemical is applied every-other swath taking advantage of the pests' natural movements.

Utah Department of Agriculture will cost share on approved areas that have infestation. NUPA will coordinate with UDAF to get areas approved and paperwork processed to be reimbursed for chemical costs of the application. Land owners will need to pay in full for application and chemical costs up front, then after the application, as per the UDAF process, NUPA will submit all required documentation to UDAF to receive the reimbursement. Once the reimbursement has been received NUPA will return that money to each land owner. It is the intent of this program to streamline and consolidate the process of getting the cost share processed and received from UDAF. Estimated time to receive the reimbursement after the application is complete is 30-90 days.

Costs per acre

Chemical Costs**	\$1.48	**UDAF will reimburse. (NUPA will keep 10 cents per acre for admin costs)
<u>Application Costs</u>	<u>\$1.20</u>	
Total up front Cost	\$2.68
